BARACK OBAMA

1. In 2009, Barack became the 44th president of the United States for 8 years. What was the year that he stopped being president?
2. Barack had a meeting at 5pm, it finished at 8pm. How long was his meeting?
3. Barack had a meeting at 08:00, it took 3 hours. What time did he finish?

Exit Ticket

1. Can you create a meeting schedule for the former president?

You must use at least 6 different meetings.

E.g. Barack is meeting the French president at 09:00 and it lasts for 2 hours.

LEWIS HAMILTON

1. Lewis competed in 44 races in a year. He won 3/4. How many races did he win?
2. Can you draw a part whole model to represent the amount of races he won?
3. Lewis drove 100 miles. He stopped four times. Can you represent how many miles he drove then stopped using a bar model?
4. Lewis Hamilton has raced 45 times. He won 4/5 of his races. Can you work out how many races he won in total?

Exit Ticket

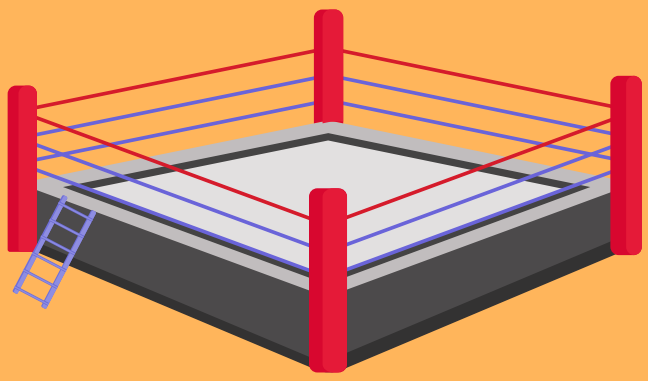

1. Can you create a meal plan for this athlete and use fractions in your answer?

For example,
Lewis had 21g of porridge, he ate 2/3. How much did he eat?

ANTHONY JOSHUA

1. He fought 55 matches, and only lost 2 x 4 of these. How many did he win?
2. He trained for 56 hours a week. How many hours did he train per day?
3. He ran around the city for 145 minutes. Can you represent this time in hours?
4. He ate porridge every morning. For 5g of oats, he needs 10ml of milk. How much milk will he need for 20g of porridge?

Exit Ticket

1. Can you make a fruit smoothie for the world famous boxer?

You must only use grams in your workings out.
E.g. 1 x 20g banana

DIANE ABBOTT

1. Diane Abbott worked in Parliament and helped 5,938 people in Hackney North in September.
In January this number doubled. How many people did she support in January alone plus the two months together?

2. True or false...
Diane Abbott receives 916 votes in total.
NW London: 220
SW London: 20 less than NW
EW London: 3 times the amount of SW London.

3. How many votes in total did Diane receive over four areas?
2,867
1,742
902
4025

Exit Ticket

1. Can you draw a map of all the locations in London where Diane will have to travel to seek votes.
2. Then, add up all miles in total.

You can use up to 10 locations.

JORJA SMITH

1. Jorja Smith earned £300 for one concert. How much money would she earn for three concerts?

2. Can you work out how much money one hoodie is at one of Jorja's concerts?

3. For a child concert ticket it costs £56. An adult ticket is double this.
How much would it cost for 2 children and 3 adults to attend?

Exit Ticket

1. Can you draw a table of items that can be bought a concert and ticket them at different prices between x-amounts.
2. Then, can you work out if you can afford different items with only x-amount of money?
